

WHAT ARE CUP TABLES?
 College and University Programs. Tableau (CUP) Tables were developed to help students and potential students identify and associate educational and training programs with particular institutions. The tables also help users establish a connection between these programs and the world of work.

CUP Tables are used in the workplace to help students and potential students identify and associate educational and training programs with particular institutions. The tables also help users establish a connection between these programs and the world of work.

CUP Tables were developed to help students and potential students identify and associate educational and training programs with particular institutions. The tables also help users establish a connection between these programs and the world of work.

More than 200 post-secondary educational institutions in Canada provide the information which is then assembled and presented in the CUP Tables. These institutions include: Colleges, Universities, Technical Institutes, Vocational Schools, and other post-secondary educational institutions. This includes all certified programs which lead to a certificate or diploma. Also included are Transfer programs: students who have the necessary credits may be accepted on an individual basis for admission to an affiliated college or university; and Co-operative education students studying under a co-operative system spend alternate terms in academic studies and in work within business, industry or government.

HOW TO USE THIS TABLE:

- Look up the Field of Work shown across the top of the table and select the occupational area that interests you most.
- Look down the occupational areas for symbols used to identify occupations.
- Select the symbol(s) that interest you.
- Consider the length and level of the programs offered, as indicated by the symbols and select a school.
- Additional information on the programs and the school can be found in its calendar, or by direct enquiry.
- If, on the other hand, you are interested in a particular institution but do not know the nature of the programs offered, contact the institution directly for information regarding the programs offered. The symbols will help you select the most suitable program relevant to your occupational interest. Further information can then be obtained from the school or its calendar.

QUE SONT LES TABLEAUX DES PROGRAMMES DES UNIVERSITÉS ET DES COLLÈGES?

Ils ont été conçus dans le but de faire connaître aux étudiants, actuels et éventuels, les programmes d'enseignement et de formation des diverses établissements qui offrent aussi les usages à établir des liens entre ces programmes et le monde du travail.

Ces tableaux sont compilés par région géographique et indiquent les établissements qui offrent les programmes universitaires et collégiaux. Les domaines d'activité sont numérotés suivant les grands groupes de la Classification internationale des activités.

Plus de 200 établissements postsecondaires du Canada fournissent les enseignements nécessaires pour l'emploi et le niveau des programmes qui conduisent à un grade universitaire, à un diplôme ou à un certificat.

Les tableaux indiquent aussi:

- Tous les programmes donnent droit à des crédits; les étudiants qui ont les crédits nécessaires peuvent être admis.
- Indiquent les programmes qui sont certifiés.
- Les programmes coopératifs: les étudiants qui suivent un programme de ce genre font alterner études et stages dans diverses entreprises.
- Si vous désirez déterminer les programmes visant au secteur professionnel particulier:
 - Examiner les domaines d'activité indiqués au bas de tableau et, à partir du niveau Inférieur, choisiriez le secteur professionnel qui vous intéressera le plus.
 - Examiner les programmes proposés par les établissements qui offrent les programmes que vous recherchez.
 - Déterminer si le horaire et le niveau des programmes, indiqués par les symboles, vous conviennent et choisir le établissement qui propose ce programme.
- Si un établissement prie vous d'intéresser mais que vous ne connaissez pas les programmes qu'il offre:
 - Appeler ou écrire à l'école qui vous intéresse, suivre la ligne horizontale pour connaître ses programmes.
 - Les étudiants veulent élaborer le tableau qui vous convient le mieux, selon vos intérêts professionnels.
- Vous pourrez ensuite obtenir de plus amples renseignements en vous adressant à l'école concernée ou en consultant son annuaire.
